

Revision Policy at Look Younger Clinic

Revision means client who had surgery and come back not satisfied by result.

With liposuction it happens around 15% of patients (meaning from every 100 patients around 15 will come back not satisfied by result).

We can not remove all fat present in any specific area or we risk losing skin in this area and we aim to remove around 75% of fat in any specific area.

You will have to wait 3 months for final result.

Your weight should be stable and close to your weight when you had surgery.

If you not happy with result we may advise to wait for 6 months as improvement can happen.

You agree that all payment done to clinic was relating to our professional service and time and you agree that we can not guarantee results.

You agree that even if you not happy with results and you owe clinic any remaining payment relating to surgery, you will commit to pay it.

We will repeat surgery done (we will repeat the exact surgery meaning if you had liposuction from love handles and fat to bum, we will do liposuction from love handles to bum) for £900.

Being unhappy with result or not satisfied with result will not be a basis for refund for what you paid.

Revision policy applies to liposuction area only, not bum or breasts, if you would like to achieve a bigger bum or breasts, that will be charged as a new area with standard price, not reduced fee. We have no control on how much fat will survive in bum or breasts.
